Obesity Days @Frankfurter Meeting: November 05-06 2026

	Workshop Arzt & Recht
05.11.2026	ROOM KOMET
09:00 – 10:30 am	Chairman: Tim Werner (Germany)
	Die Versorgung der an Adipositas Erkrankten mit bariatrischen Operationen wird immer besser. Die große Mehrheit der Adipositaszentren operiert – nach leitliniengerechter Indikationsstellung – ohne präoperative Beteiligung von Krankenkasse und/oder Medizinischem Dienst. Die wenigen Streitigkeiten, die aus diesem (völlig system- und gesetzeskonformen) Vorgehen erwachsen, entscheiden die Krankenhäuser in der Regel für sich. Probleme gibt es hingegen bei der medikamentösen Versorgung der an Adipositas Erkrankten und bei der postbariatrischen Wiederherstellungschirurgie. In diesem Workshop ordnen wir für Sie ein, warum das so ist und was man tun kann, um hier zu Verbesserungen zu kommen. Das erwartet Sie: • Die rechtlichen Voraussetzungen der medikamentösen und der chirurgischen Therapie der Adipositas • Die postbariatrische Wiederherstellungschirurgie im Dreiecksverhältnis Patient-Leistungserbringer-Krankenkasse • Der Rechtsweg: Antrag, Widerspruch und Klage zum Sozialgericht • Raum für Ihre Fragen aus dem Klinikalltag (inkl. postoperative Abrechnungsprüfung und Vergütungsstreit)

	Hands On Workshop: Lipoedem
05.11.2026	ROOM KRISTALL
09:00 – 10:30 am	Chairman: Stefan Rapprich (Germany)
	Das Lipödem wird im klinischen Alltag noch immer häufig mit Adipositas verwechselt – mit erheblichen Folgen für Betroffene und Behandelnde. Gerade an der Schnittstelle, an der sich dieser Workshop bewegt, lohnt der genaue Blick: Wo endet die Adipositas, wo beginnt das Lipödem, und was bedeutet diese Abgrenzung für Diagnostik, Therapieentscheidung und Kostenübernahme? In diesem Workshop ordnen wir die aktuelle Situation für Sie ein – praxisnah und auf dem neuesten Stand. Im Mittelpunkt steht die seit dem G-BA-Beschluss grundlegend veränderte Versorgungslandschaft: Die Liposuktion ist nun stadienübergreifend GKV-Leistung. Was das konkret für Indikationsstellung, Antragstellung und Abrechnung bedeutet, klären wir entlang konkreter Fallkonstellationen. Das erwartet Sie: - Sichere Diagnostik und differenzialdiagnostische Abgrenzung Lipödem vs. Adipositas und Lymphödem - Konservative und operative Therapieoptionen – Evidenz, Indikation, realistische Erwartungen - Die neue gesundheitspolitische und kassenrechtliche Lage nach dem G-BA-Beschluss - Was die GKV-Kostenübernahme in der Praxis erfordert: Voraussetzungen, Stolpersteine, Dokumentation - Raum für Ihre Fragen aus dem eigenen Behandlungsalltag Sie nehmen einen klaren, anwendbaren Überblick mit – fundiert genug für die Sprechstunde am Montagmorgen.

Obesity Days @Frankfurter Meeting: November 05-06 2026

	Workshop Praxismanagement
05.11.2026	ROOM OKZIDENT
09:00 – 10:30 am	Chairman: Karsten Behle (Germany)
	Die Erkenntnis, dass Adipositas eine chronische Erkrankung ist, ist in den meisten Bereichen der Medizin angekommen. Spätestens mit der Zulassung der „Abnehmspritzen“ ist auch in der breiten Bevölkerung ein verstärktes Interesse an modernen Therapieoptionen und fachlicher Beratung gewachsen. Die weitreichenden Folgen für die niedergelassenen Praxen werden jeden Tag deutlicher, doch Konzepte aus der Praxis für die Praxis sind Mangelware. So schaffen es z.B. die „Glücksritter“ der Sozialen Medien die verzweifelte Patienten „abgreifen“ und damit guten Umsatz machen. Wir werden konkret vier Antworten erarbeiten, die Sie in die Lage versetzen werden, eine dringend benötigte, medizinische Leistung mit wirtschaftlichem Erfolg anzubieten. Wir erarbeiten die Grundstruktur auf der Sie Ihr ganz persönliches Praxisangebot entwickeln können.

04:00 – 05:30 pm	Chairman: Martin Fried (Czech Republic)
	Moderator: Florian Seyfried (Germany)
	Moderator: Wah Yang (China)
10 min	Study Comparing the Long-Term Weight Loss, Comorbidity Remission, and Complication Outcomes Following Single Anastomosis Sleeve Ileal Bypass
	Muhammed Taha Demirpolat (Türkiye)
5 min	Discussion
10 min	Research and Innovation in Obesity Management in China and the Call for Global Partnership
	Wah Yang (China)
5 min	Discussion
10 min	The Impact of Obesity Onset and Duration on Outcomes after Metabolic Bariatric Surgery: an International Multicenter Cohort Study
	Adisa Poljo (Switzerland) and Study Group
5 min	Discussion
10 min	Comparison of Magnetic vs Stapled Jejunum-Ileal Transit Bipartition
	Martin Fried (Czech Republic), Dana Charpentier (Czech Republic)
5 min	Discussion
10 min	Endoscopic Gastroplasty and Laparoscopic Gastric Plication - Similarities and Differences
	Dana Charpentier (Czech Republic)
5 min	Discussion
10 min	Bikini Line Access in Metabolic Bariatric Surgery: More Than a Decade of Experience
	Tamer N. Abdelbaki (Egypt)
5 min	Discussion
